

Construction Manager

Location: Fargo, ND

Lowry Engineering is seeking a full time Construction Manager to help support projects in North Dakota and Minnesota. The position will be located out of our office in Fargo, ND. The selected individual will provide construction related technical support to the Project Engineer and provide project supervision to ensure construction work is performed efficiently, on schedule, and in accordance with engineering standards.

Job Responsibilities:

- Manage, direct, monitor, and document project progress during the construction phase of municipal and private infrastructure construction projects and highway construction projects
- Understand engineering principles and apply to construction projects
- Analyze survey, mapping, and materials-testing data
- Management of inspectors and field staff members
- Communicate with contractors, subcontractors, clients, and sub-consultants in a professional manner
- Prepare drawings and visual aid
- Understand and process pay estimates
- Multitask
- Travel as necessary for project oversight
- Work in all weather related conditions
- Other duties as assigned

Qualification Requirements:

- Bachelor's Degree in Construction Management or related field with construction experience preferred OR High School Diploma or higher with 10 years of infrastructure construction experience required
- Must have a valid driver's license
- Ability to read and understand civil plans and specifications
- Ability to understand and utilize basic AutoCAD functions
- Ability to perform physical work
- Ability to speak and write English clearly
- Excellent oral and written communication skills

Lowry Engineering has an excellent salary and benefit package. Please send resume and cover letter to:
